SUMMARY

As a lifelong learner, I am currently focused on expanding my knowledge and skills in the exciting and rapidly-evolving field of blockchain technology. Through self-directed study and online courses, I am gaining a deep understanding of the underlying architecture, consensus mechanisms, and smart contract development.

PROJECTS

LOTTERY PROJECT BASED OF BLOCKCHAIN

- A basic but effective lottery system for the users based on cryptocurrency.
- 100% tested functionalities using Mocha technology.
- Transactions based Metamask wallet.
- Simple form designed using HTML and additionaly some more component managed by the manager of the game.

CURRENTLY WROKING ON KICKSTARTER PROBLEM FOR FUND RAISING

- As per current scenario, there are various frauds taking place on such platforms.
- the solution is being under implementation which is intended to reduce the frauds upto 92%.
- The accuracy of the solution is nearly 90% and even more because the smart contract is designed is such accurate way.
- The solution increase the efficiency of the process and maintain security of all the money donated for the product.
- The frontend is very similar to the Original work represented.

EXTRA

Etherum and Solidity Course

UDEMY

2023-present

- Use Ethereum, Solidity, and Smart Contracts to build production-ready apps based on the blockchain.
